

Medical Coaching Training Program

Module 2 – Process

Lesson 4, Class Assignment

Work with a fellow Medical Coaching student or PMC.

1. Practice the **Reframing Values technique**.

In your report, address the following:

- Please send a photo of the completed table (in your language and with your scribbles)
- The way you got to the original value
- The way you elicited the positive learning out of each comparison
- The new name
- Three examples of things you noticed in calibration. Please include at least one example of when you knew that the client arrived at the positive learning.
- If you were to give the client a "homework" assignment that would help the client "deepen the learning and forward the action", what would it be and why?
- What was your practicing partner's experience as a client?
- Dilemmas and questions
- Your learnings

Send the report to your mentor in a WORD format.

Enjoy 😊
